OBJECTIVE

Frontend Developer with a strong interest in creating intuitive and high-quality web products. I have a proven ability to collaborate effectively with cross-functional teams to transform ideas into functional interfaces.

My goal is to collaborate effectively with global cross-functional teams to build stable, user-centric products that drive strong business impact.

TECHNICAL SKILLS

- **Frontend:** Vue (Nuxt.js), React (Next.js), TypeScript, JavaScript (ES6+).
- **Styling:** Tailwind CSS, Shadcn/ui, Stylus, Chakra UI, Responsive Design, Cross-browser Compatibility
- **Performance & Tools:** Vite, Web Performance Optimization (Caching, Bundle size), Browser Rendering Optimization
- **API & Data Handling:** RESTful API, GraphQL (Proficient in all projects), WebSocket
- **Workflow & Collaboration:**
 - **Process:** Agile/Scrum (Daily meetings, Jira, Trello)
 - **Environment:** Git Flow, Linux environments (WSL, Docker)
 - **Design Collaboration:** Expert in Figma-to-Code workflow, ensuring high-fidelity implementation.
 - **Version Control:** Proficient in Git Flow (Branching, Merge Requests) for seamless handover to DevOps.
 - **AI Support:** I-assisted development (Antigravity, GitHub Copilot, Claude)
- **Specialized:** Viem, Wagmi (Web3/DApp), MetaDefender (Security).

WORK EXPERIENCE

Beowulf Blockchain (May 2023 > present)

Frontend Developer

Quickom.net & Datagram Network

Tech Stack: Nuxt.js (Vue Ecosystem), TypeScript, GraphQL, RESTful API, Stripe, Viem/Wagmi

1. Quickom.net (Ticketing SaaS)

- Collaborated closely with the Design team to refine user flows, ensuring a smooth UI/UX for the complex Event Admin Dashboard/ Admin Services and Ticketing system.
- Developed business logic for event creation and integrated Stripe for secure payment flows.

2. Datagram (DePIN Ecosystem)

- Architected a Real-time Node Monitoring Dashboard for a DePIN network serving 1M+ global users, handling thousands of concurrent node streams with zero frame drops via virtual scrolling and WebSocket batching
- Delivered a seamless multi-chain wallet integration using Viem/Wagmi for Node Sale & VPN platforms, enabling users to execute smart contracts in 3 steps — directly contributing to a Node Sale that generated over \$1M+ in revenue.

Saros (Outsource for Coin98)

Tech Stack: Next.js (React), RESTful API, Zustand, Tailwind CSS

- Description: A DeFi Super App on Solana built within the Coin98 ecosystem, featuring an AMM DEX (SarosSwap), yield farming (SarosFarm), staking, and a token launchpad (SarosPad).
- Built a high-performance application using Next.js, leveraging Server Components for optimization.
- Managed complex application states (Trading data, Agent flows) efficiently with Zustand, ensuring a lightweight and smooth trading experience.
- Ensured precise logic for digital asset transactions and AI Agent activation.

Internal Learning Management System (Frappe LMS)

Tech Stack: Frappe Framework, Vue 3, Frappe Built-in API (RPC), Docker, WSL

- Provisioned and configured the open-source Frappe LMS development environment using Docker and WSL
- Customized the core UI components and engineered new features to align strictly with the company's internal business workflows.

LANGUAGES

English: Professional Working Proficiency (Equiv. TOEIC 565) - Able to read technical documents and research effectively.

ACTIVITIES

- Consolation prize for open Hackathon HCMUTE (2023)
- The student with 5 merits (university level)
- Advanced youth following Uncle Ho's words in the field of school-level study (2020 - 2022)
- Active member of the IT Faculty Executive Board, organizing academic competitions and volunteer campaigns (2019 - 2022)

Chat3.one (SocialFi Platform)

Tech Stack: Vue 3, GraphQL, RESTful API, WebSocket, MetaDefender

- Implemented Multi-chain Wallet Connection and handled core Web3 logic.
- Utilized WebSocket for real-time chat and instant user interactions (Like/Gift) with low latency.
- Managed complex Cross-window communication for seamless data synchronization between modules.
- Integrated MetaDefender (Opswat) for threat prevention, implementing smart data caching to prevent redundant file scans and optimize API performance.

Kyanon Digital (Aug 2022 > Mar 2023)

Intern / Fresher Frontend Developer

Bipbip (E-commerce Platform for Tops Market)

- Developed responsive UI components for the Bipbip e-commerce application using ReactJS, TypeScript, and Chakra UI.
- Collaborated with the Backend team to integrate RESTful APIs for core features like Product Listing, Shopping Cart, and User Profile.
- Worked closely with QA/QC teams to identify and resolve UI/UX bugs, ensuring application stability before deployment.
- Participated in daily stand-ups and utilized Git for version control in a professional Agile environment.

EDUCATION

HCMC UNIVERSITY OF TECHNOLOGY AND EDUCATION (Oct 2019 > July 2023)

Major: Software Engineering

GPA: 7.9/10
